

HUNDREDS WATCH LAYING OF CORNER STONE OF THE NEW CENTRAL HIGH SCHOOL

LAY CORNER STONE OF CENTRAL HIGH

School and Alumni Officials Participate in Ceremony for \$1,250,000 Building.

HOPES FOR FUTURE VOICED BY REPRESENTATIVE PAGE

Fred L. Fishback Wields Trowel. Several Thousand Persons Attend the Exercises.

Optimism as to the future of the District's public school system was the keynote of the exercises attending the laying of the corner stone of the new Central High School, 11th, 12th and Clifton streets and Florida avenue, yesterday afternoon. Simplicity and brevity marked the ceremony.

Representative Robert N. Page of North Carolina, in charge of the District appropriation bill, made one of the most encouraging and popular addresses of the day when he declared that during the next two years of his service he hopes not only to see the new Central building successfully completed, but to see a new building for Eastern High School as near completion as the new Central now is, and the Western High School rehabilitated.

"My interest in the District is abiding, though my connection is temporary," he said. "I am glad to have had a part, even though it was only a small one, in providing for this building. I am glad that I was one of those who wished to see a building here worth a million and a quarter dollars, instead of a three-quarter-of-a-million one as it was once proposed to have. This building is prepared for a maximum number of pupils and will meet the needs of this community for a good many years to come."

He spoke of the greater satisfaction which he believed would come with the new equipment.

Newman Speaks Briefly.

Oliver P. Newman, president of the District board of Commissioners, spoke briefly, saying: "We are doing the best job we possibly can with the money in hand. We expect to do a good job. If the building is as good as the work which you of Central do, we shall feel that we have done a good job."

Henry P. Blair, president of the board of education, spoke of Central as a school that has always stood for the things which are the best and highest.

"I wish for the new Central High School the best hopes and the best thoughts which the board of education and officers throughout the system feel," he said. "We hope to see Central's ideals maintained and her accomplishments increased."

Mr. Blair complimented the pupils and teachers of Central and referred with

pride to the interest which the people of the United States take in education. "Central is very happy today," said Emory M. Wilson, principal of the school. "If such a state of mind can for a moment be tolerated, she is quite happy. No small part in her present, if Central is proud and exultant today she is still serious. The new school is a serious of her obligations. She expects to pay off her debt in boys and girls better for having been bathed in the Central spirit."

First Principal Is Lauded.

Gideon A. Lyon, a member of the first class to enter the O street building and

of the first class to complete its full course in it, paid tribute to Edward A. Paul, first principal, who died in 1888. "Mr. Paul sacrificed an opportunity to become superintendent of schools in order that he might remain principal of Central," said Mr. Lyon. "He wished to see the evolution of a great city college, but the evolution was different than he anticipated and we have instead five high schools."

"The spirit of Mr. Paul never faded and is this same spirit that which caused him to sacrifice the superintendency which has lived and has made Mr. Wilson and Mr. Fishback essentially the heroes of today."

The stone was laid by Fred L. Fishback, now vice president of the Central High School Alumni Association and president of the association when the appropriation for the new building was made. Mr. Fishback was one of the hardest workers to obtain the new building. The stone bears on it, "Central High School, A. D. 1915."

Prior to the laying of the stone Mr. Fishback spoke briefly, saying that the

FREDERICK L. FISHBACK, Who laid the corner stone.

building in a veritable "Mt. Zion," where all must find "inspiration in looking out from this place upon the monument to the father of his country, upon the memorial now rising in the park by the river to the savior of his country; upon the Capitol itself and upon the city and its river with their historical associations. If we are going to get out of this school all that we should to help us measure up to the standard of citizenship, these great men have set for us. We must remember that the chief aim of all education is the building of character."

Contents of Corner Stone.

"We have placed in this stone today the law of God, the foundation of all our law, the Constitution of the United States, the basis of our national structure. I can only hope that those who teach here and those who study here in the years to come will work with an eye single to keeping the law of their country and to reverencing the law of God, and remember that 'the fear of the Lord is the beginning of wisdom.'"

In addition to the Bible and the Constitution copies of the Alumni Record and the Review, official publications of the Central Alumni Association and of the school, respectively; copies of the daily papers containing accounts about the corner stone laying; history of the old Washington High School and the Central High School, prepared by George W. Hodgkins, general secretary of the alumni association, and a list of the teachers and students there at present; a copy of the box, of copper and hermetically sealed, in the stone. The laying of the stone was followed by loud cheering and singing, under the leadership of Mr. Fishback, of "America." Surmounting the crane the corner stone in position was an American flag.

Across one portion of the building west of the central flag of blue and white, Rev. Clarence W. Whitmore of St. Agnes' Church, a graduate of the school, and Rev. Jay T. Stocking of the First Congregational Church, pronounced the invocation and benediction, respectively.

Several thousand persons attended the ceremony. All joined in singing "Here's to Old Central," under the leadership of Principal Wilson. Members of the board of Commissioners and of the board of education occupied places on the platform. Ernest L. Thurston, superintendent of schools, Alexander T. Stuart, former superintendent of schools, and Stephen E. Kramer, assistant superintendent of schools, were unable to be present.

Site Big and Commanding.

The site of the new Central High School building is commanding and generous. It covers about nine acres, extending from 11th to 13th street, and from Florida avenue to Clifton street, overlooking the city and the valley of the Potomac. From the upper stories of the new building it will be possible to see Arlington and Mount Vernon.

The building, of the Georgian style of architecture, rectangular in shape, with an extra width of 400 feet and a depth of about 250 feet, will be built on the upper part of the site, facing Clifton street, placed fifty feet back from the sidewalk. Broad terraces, 156 feet in width, will extend on either side to 11th and 13th streets.

The lower, or Florida avenue, end of the site will be given over to the athletic field and stadium. The site, having approximately a 10 per cent grade, lends itself admirably to this treatment. In leveling for the athletic field there is left a natural bank, against which will be placed a concrete stadium to accommodate 4,000 spectators, extending a little more than half way

around the elliptical quarter-mile track which will encompass the field. This field will give opportunity for a regulation foot ball field, tennis and basketball courts. Tennis courts will be laid out on the terrace between the building and 13th street also. Under the stadium, connecting with both the field and the building, provision is made for the later installation of locker and toilet accommodations for the general public as well as for those taking part in the athletic contests, school festivals and similar events which will be held on the field.

Novel Cinder Track.

Between the upper level of the stadium and the building will be a broad promenade. Under this promenade, lighted by sidewalk skylights, will be found one of the most unusual athletic features of the school. Extending, as it will, the full length of the building, it will furnish underneath, between the back of the stadium and the building, an indoor cinder track 22 feet wide and 133 yards straight-away. It is believed to be the only track of its kind in America.

The building, faced throughout with dark, buff-colored tapestry brick, with Bedford stone trim, will be three stories in height above the ground floor. The three stories of the main building will comprise the auditorium, classrooms, laboratories, music and drawing rooms. The ground floor, well above grade and amply lighted, will accommodate the lunchroom, the domestic science room, mechanical drawing, the manual training shops. The latter will be in what virtually is a wing on the south side of the building, still above grade because of the slope of the hill, is to be a basement, in which will be located the armory, 102 feet by 22 feet; the swimming pool, 102 feet by 22 feet, with a diving board and power plants. The swimming pool, 80 feet by 24 feet, will be lighted by direct sunlight. It will be arranged with shower room and with separate dressing rooms for girls and boys.

Ten Entrances All Told.

There are to be three entrances to the first floor from Clifton street. Seven entrances from all sides of the building will lead into the ground floor. The main building will have two light courts 50 feet by 80 feet, between which will be the lunchroom and above it the auditorium, extending through three stories to the top of the building. The classrooms, laboratories, extending around the perimeter of the building, are all to be outside rooms. Four main stairways will be placed at the intersections of the corridors at the rear of the building. They will be lighted by direct sunlight, thus doubling the effective use of the stairways for rapid circulation between floors. Two additional stairways will be arranged to serve the gymnasium and shops and also will be brought into service as exits from the auditorium.

Forty-seven classrooms are to be provided in the building, twenty-four of which will be twenty-four feet by twenty-four feet, and twenty-two will be twenty-four feet by twenty-two feet. The laboratories will be lighted about 600 additional feet, bringing the total pupils capacity of the building slightly above 2,500. The classrooms are to be provided with two bookcases and natural light blackboards.

The science laboratories will be arranged in groups on the first and second floors of the building. Two are to be for photography, three for chemistry, three for physics and one for biology. The latter group on the south side of the building will open into a conservatory. Each laboratory group will be provided with an instructor's room and a dark room for photographs.

Five Rooms for Art Work.

Five art rooms are to be provided on the third floor, three for freehand drawing and two for art craft work. The rooms will open on to the main corridor, which is arranged as a top-lighted exhibition gallery, 18 feet wide and 288 feet long. The domestic science group consists of two sewing rooms, with fitting and store rooms, a cooking room with storeroom, a model dining room and a laundry.

The administration group is to be located on the first floor near the main entrance, and will consist of a general office with work and store rooms, a library, a reception room and the principal's office.

The library and storeroom will be on the second floor above the main entrance. The library is to be an especially attractive room, furnished in wood wainscot. It will be 40 feet by 100 feet, with a high ceiling and will have a carved stone mantel and fireplace. It will accommodate 270 pupils at one time. The stockroom will accommodate about 10,000 volumes. Reference books and books in great demand at any particular time will be exposed in the library. The library is to be an especially attractive room, furnished in wood wainscot. It will be 40 feet by 100 feet, with a high ceiling and will have a carved stone mantel and fireplace. It will accommodate 270 pupils at one time. The stockroom will accommodate about 10,000 volumes.
